

## High Speed Beveler US80/150-HSB (6-14")

- The hydraulic PROTEM **US80/150-HSB** machine can be used either on site or in a workshop.
- The machine is transportable, easy to install and will be clamped into the inside diameter of the pipe.
- The **US80/150-HSB** is used for beveling, facing and counter boring (short) works. These works can be processed individually or simultaneously.
- It will perform repeatable high quality bevel with a V, J, X shape or compounded bevels perfectly suitable for the orbital or manual welding process.
- It can be operated for the main pipe materials such as stainless steel, carbon steel, and all exotic alloys such INCOLOY, HASTELLOY, INCOLOY DUPLEX etc.

### Technical features:

The US80/150-HSB can be equipped with two different clamping mandrels. Within a few hours, through the replacement either of the mandrel US 150 or the replacement of the mandrel US 80, the range of diameters can be reduced or increased according to the version of the expansion mandrel.
